

Will the Elementary continue with a hybrid program?

- Upper Elementary (UE) Pods, we will very likely continue a 4-day on-site schedule, with one remote day each week for specials like music, art and foreign language.
- This remote day allows the school to minimize “cross contamination” with multiple specialty teachers.
- Currently for Lower Elementary (LE), there are 3 Pods of students which are on-site half week, and learning remotely the other half of the week.
- Our *hope* is to increase the number of on-site days for LE. We will be able to confirm this around the end of March, once enrollment agreements are received and parents have informed us of their preference for on site or distance learning.
- There may be updates from the county that allow for more students in each Pod, which will allow the school to increase the number of on-site days.
- Until we have further information, you can assume that the on-site LE Pods will at least continue the half-week on-site schedule that is in place currently.
