

Are restrictions being relaxed, given the availability of vaccines?

- School faculty and staff are approved to start receiving vaccines beginning Feb. 28th
- We understand that vaccines may be available for children possibly in the summer, or perhaps by end of the year (Dec. 2021)
- This offers hope for a return towards normalcy and is wonderful news
- Until Santa Clara County achieves “herd immunity”, the school will continue to enforce mitigation measures, like small, stable cohorts, distancing and wearing of masks.
- Given our facilities, there is ample space to increase Pod sizes once public health allows it.
- It is reasonable to hold that we may be able to re-evaluate our systems in December, after we experience more of the success of vaccines and the general increased health of our county.
